

# Graduates of the ABD-UNE PGY1 Residency

will be trained to serve as experts in the field of specialty pharmacy, ready to:

- Provide ongoing disease management for patients with complex, chronic conditions including infertility; organ transplant; infectious diseases, such as hepatitis C; and inflammatory conditions, such as rheumatoid arthritis and Crohn's disease
- Develop and implement didactic and lab-based educational material in an academic setting
- Design and present sophisticated outcomes analyses that demonstrate the value of today's specialty pharmacy services

trainings

## Purpose Statement

The PGY1 Community Pharmacy Residency Program builds on doctor of pharmacy (Pharm.D.) education and outcomes to contribute to the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training.

Pharmacist residency education and training in community-based practice aims to develop pharmacy leaders who are capable of improving the health of patients within the communities they serve. The primary purpose of the program is to foster the development of community-based pharmacist practitioners who are community-focused practice leaders, serving as an access point for care and having the skillset necessary to provide quality generalist patient care services wherever health and medication needs arise.

outcomes

### Portland, Maine

The home town of ABD and UNE is actually a small city, whose quality of life has topped national rankings and whose "creative economy" is attracting entrepreneurs, artists, students, and professionals of every kind. There's something for everyone here – from famed restaurants and breweries (more per capita than almost anywhere in the country), to an eclectic mix of museums and galleries, to nearby mountains, forests, and beaches. Visit [liveworkportland.org](http://liveworkportland.org), and you'll learn why the city slogan is "Yes, life's good here."

# your future

## PGY1 Community Pharmacy Residency in Specialty Pharmacy

Specialty pharmacy is one of the fastest-growing areas of the pharmacy profession – and an area where more and more new pharmacists are seeking dedicated, real-world training.

As a leader in specialty pharmacy, Apothecary By Design (ABD) has teamed with the University of New England to create one of the few specialty-focused PGY1 community pharmacy residencies in the country. A residency that allows you to gain extensive management and clinical experience, in every aspect of specialty pharmacy services. All in the vibrant, coastal city of Portland, Maine.

ABD's pharmacist team includes certified specialty pharmacists and brings decades of experience to patient care.

### Practice Site

Headquartered in Portland, ABD is a rapidly growing specialty pharmacy serving patients throughout nearly the entire United States. For three consecutive years, ABD has been ranked on the prestigious Inc. 5000 list of the country's fastest-growing private companies, while also being named one of the "Best Places to Work in Maine."

The ABD team is a diverse group of more than 100, from young professionals to seasoned leaders, who embrace the entrepreneurial, patients-first culture for which the pharmacy has always been known. Preceptors at ABD include clinicians who have years of experience in their specialty area, are certified specialty pharmacists, and have completed residency training.

The University Of New England College Of Pharmacy is a leading educator of the next generation of pharmacists. Established in 2009, the college is among 27 other healthcare programs offered at UNE. The college is dedicated to educating pharmacists who will thrive in interprofessional, team-based patient care environments, and who are committed to serving their communities.
